

Experts in pharma transportation

Our dedicated pharmaceutical facility at Dubai International Airport (DXB) offers best-in-class protection for sensitive pharma shipments.

Combined with our facilities at Al Maktoum International Airport (DWC) and multiple daily frequencies across our network, our dedicated pharmaceutical facility is the largest GDP-certified* multi-airport hub in the world.

3 innovative products for all types of pharma

Emirates Pharma is for pharmaceutical products which are less sensitive to temperature fluctuations.

- Products transported with high quality passive or advanced passive packaging
- Products of lower value with thermo-cover provided by the shipper
- Products with high temperature tolerance and with stability data range of +2 to +40 °C
- Pharmaceuticals which previously moved as GCR, will now move in a temperature controlled environment

*By Bureau Veritas

Innovative solutions for pharmaceuticals

Emirates Pharma

Comprehensive solutions for transporting temperature-sensitive pharmaceuticals

Emirates Pharma Plus is intended for pharmaceutical products that have highly sensitive temperature tolerance levels and need high-level protection.

- Products with low quality packaging needing additional protection and / or extended duration of existing packaging
- Products of medium or high value
- Products with low temperature tolerance and with a stringent stability data range
- Products that require a high level of temperature protection during ramp transit

Emirates Pharma Active is designed for pharmaceutical products that require the highest level of temperature-stable handling and transport conditions.

- Products that require active containers where a constant temperature is maintained from door-to-door
- High value products

GDP certified by Bureau Veritas

With certification from the EU based Bureau Veritas, Emirates Pharma adheres to the most stringent guidelines and best practices for the transportation of all types of pharmaceuticals to ensure product integrity throughout the journey.

- Temperature-controlled environments to avoid temperature fluctuations
- Segregated environment to avoid cross-contamination
- Highly secured operations
- Skilled technical staff to ensure adherence to procedures at every step

Comprehensive reach and quick turnaround

Goods like pharmaceuticals that are temperature-sensitive and require a robust distribution network, can rely on Emirates Pharma.

- Comprehensive global network covering over 155 destinations
- Youngest wide-bodied fleet in the air
- More than 250 flights departing from Dubai every 24 hours
- 12 dedicated reefer trucks operating 24/7 between the two Emirates Pharma hubs at Dubai International Airport and Al Maktoum International Airport

Please contact your local Emirates SkyCargo office to know more about transporting pharmaceutical products with us.
