

Introducing Emirates Equine

We understand that compromise is not an option when it comes to caring for your horses – especially when they are in transit. To protect their wellbeing and to supply you with a peace of mind, our Emirates Equine service provides your horses with the highest levels of care and attention at every step along their journey.

With the focus on your horses' comfort and safety, Emirates Equine uses stalls that are specifically designed for our state-of-the-art freighter aircraft. Combined with temperature controlled zones and on-board accommodation for professional grooms. Our in-flight facilities ensure that your horses arrive in peak condition and are ready to perform to the best of their ability, whether they are competing in a race, a show jumping event or to simply relax in a new destination.

On the ground, members of our highly trained Emirates Equine team are on-hand to offer additional support and guidance. In addition, every aircraft is provided with an Emirates Loadmaster. Who is experienced with focusing on making sure the journey is smooth and precisely organised to ensure the safety of the horses and grooms.

Operating in accordance with IATA's Live Animal Regulations, Emirates Equine offers one of the world's most stable environments for horses in transit, both in the air and on the ground.

Bespoke transportation solutions for your thoroughbreds

Emirates Equine

Transporting your horses in complete comfort and safety

Transporting your horses

Departure

At the airports, the experienced loadmasters ensure that the horses are moved swiftly through the mandatory Acceptance Processes without any stress.

In-flight

Our 13 state-of-the-art B777F air freighters and one B747F incorporate up to 25 stall positions for transporting horses. Each stall is designed to hold up to three horses, depending on your requirements.

Arrival

At the destination, our dedicated equine specialists co-ordinate a streamlined process that ensures stalls holding your horses are unloaded from the aircraft first. Horses are then guided from the stalls into horse mobiles. These fully air-conditioned vehicles are custom-designed to carry horses to their final destination in complete safety and comfort.

Caring for your grooms

Calm, relaxed handlers mean calm, relaxed horses. That's why we go the extra mile to care for your grooms throughout their journey.

Departure

Our aircrafts can accommodate up to nine grooms per flight.

At Dubai Airport, the Marhaba meet and greet service allows grooms to swiftly move through the pre-departure airport logistics, so that they are onhand at the horse ramp in time for the loading processes.

In-flight

We provide grooms with spacious, High Comfort seats on our air freighters along with ready access to meals and refreshments enroute, ensuring they are in good shape to care for your horses at their destination during the journey and at the destination of arrival.

Arrival

We list all grooms on the air freighter's General Declaration, which means that they transit the airport with the flight crew, spending as little time away from the horses as possible.

For Further Enquiries

Our dedicated Emirates Equine specialists are standing by to advise you on how Emirates Equine can match your horses requirements. Start by confirming the number of horses you are transporting, how many grooms are accompanying them and any additional equipment you require. We will take care of the rest – from booking space and stalls for your horses to arranging e-tickets for your grooms.
