Horse Transportation

Understanding your needs

In the competitive world of horse racing, the difference between first and second place sometimes comes down to a nose. With Dubai becoming a major player in the world of horse racing, we take the transportation of horses very seriously. With our state-of-the-art freighter aircraft and expert care provided by professional equine handlers, we ensure that Emirates SkyCargo is your best choice when it comes to transporting thoroughbreds.

A stable environment for horses

From the moment you entrust your horses to us until the time we deliver them back to you, we keep one thing in mind - the animal's well-being.

In accordance with IATA's Live Animals Regulations all our equine passengers are loaded into specially designed horse stalls that are fully enclosed self-contained units, approved and developed, in consultation with veterinary experts.

To maximise the safety of your thoroughbreds, separate ramps at the front and rear of the stall are used for loading and unloading, with the animals always facing the front of the aircraft during flight. Non-slip floors and interiors without rough or sharp edges are also standard features. The stalls can be adapted to carry upto three horses, depending on their size, age, condition and the owners' requirement.

Comfort and Care

To ensure their comfort throughout the journey, horses travel on board our state-of-the-art freighter aircraft with several independently air-conditioned zones. The aircraft allow us to regulate the temperature, pressure and ventilation to suit the individual needs of the animals. Additionally, the long haul capabilities of the 747 freighter aircraft prevent unnecessary stops.

Our dedicated cargo professionals across the globe put the welfare of each animal first, carefully monitoring its condition and watching closely for telltale signs in its behaviour. We also have the additional backing of a team of veterinarians and equine specialists who are on call at all times.

For the added comfort of the horses during the flight, Emirates is permitted to carry grooms on board a freighter aircraft (number of grooms limited to aircraft type).

Easy booking

Information required:

- Number of horses to be transported
- Number of horse stalls required
- Origin/Destination
- Date of travel
- Complete details of groomers
- Consignee and Consignor details

Preparation of document requirements:

- All necessary freight papers
- Customs documents
- Health papers and certifications
- All necessary export licenses and other relevant permits

Equipment details:

For equipment accompanying the horses, the following must be adhered:

- Equipment to be booked in accordance with country requirement (under the same AWB as the horse or separate)
- We require an approximate weight for equipment, in order to block space

Unit Load Devices

We understand how important it is for horses to reach their destinations in perfect condition. That is precisely why we take their transportation as seriously as you take the competitive sport of horse racing. Our unit load devices (Horse Stalls) for these magnificent creatures are spacious and comfortable.

Horse Stall specifications:

PM base with IATA specified horse box stalls

Available with canvas top or solid roof

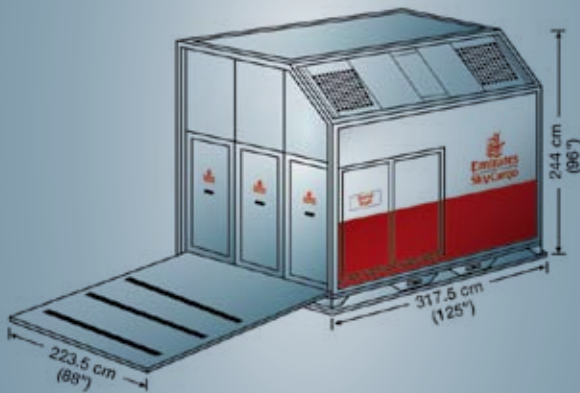

Volume: 15.3 cubic metres (540 cu.ft)

Standard Tare Weight: 1,310 kgs

Max. Gross Weight: 3,500 kgs

Max. Capacity: 3 horses

Our spacious stalls make Emirates SkyCargo your preferred choice, when it comes to transporting thoroughbreds.
