

Emirates SkyCargo Fact Sheet

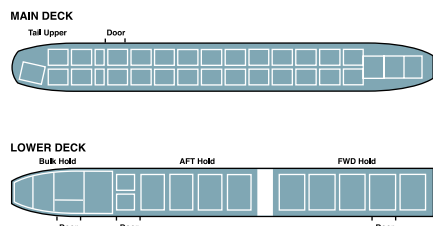

Hello Tomorrow

Freighter Fleet

Boeing 747-400ERF

In addition to cargo carried in the holds of our passenger aircraft across the Emirates SkyCargo network, we also operate Boeing 747-400 freighter services.

The Boeing 747-400 freighter is capable of carrying up to 117 tonnes. Emirates SkyCargo's pure freighter services add the much needed capacity on high density routes. Additionally, the Boeing 747 freighters' main deck-side cargo door, with a height of around three metres, allows the uplift of oversized shipments that cannot be accommodated in the belly-hold of passenger aircraft. The nose cargo door allows the carriage of long pieces.

The world's most advanced long-range freighter is a good-neighbour aircraft too - its noise footprint is 50 percent smaller than its predecessor, the Boeing 747-200F, and emissions are significantly lower.

A unique feature of the aircraft are the independently controlled air-conditioned zones, enabling Emirates SkyCargo to carry items requiring different temperatures on the same flight. Each zone can be maintained at different temperature levels.

With its greater capacity, longer range, increased reliability, speedier turnarounds and an improved environment for perishables, our new Boeing 747-400 freighters bring Emirates SkyCargo's customers a host of additional benefits.

Boeing 777F

The Emirates fleet is amongst the youngest in the world, providing high standards of care and reliability to its customers. The same is true of the SkyCargo freighter fleet. In the Boeing 777F, we have the most modern, technologically-advanced large freighter available. Powered by twin General Electric engines, the Boeing 777F is also the most environmentally-friendly freighter operated today, with the lowest fuel burn of any comparably-sized cargo aircraft. It is capable of carrying up to 103 tonnes of cargo non-stop on 10-hour sector lengths. The main-deck cargo door is the widest of any freighter aircraft with a width of 3.7 metres, which enables it to uplift oversized cargo, including most modern aircraft engines. With a vast supernumerary area behind the flight deck, the Boeing 777F has seating for up to 11 cargo attendants, which means that it is also capable of carrying consignments of horses and other livestock.
