Emirates SkyCargo operates a fleet of over 270 modern wide-bodied aircraft, including 14 Boeing 777F. Emirates SkyCargo freighters operate to 40 scheduled global destinations, out of which 16 are freighter only. Emirates SkyCargo plays an integral role in Emirates' expanding operations, contributing 14% of the airline's total transport revenue in 2017-18.

Emirates SkyCargo operates state-of-the-art cargo facilities at its dual hub locations in Dubai. Emirates SkyCentral (DXB), located at Dubai International Airport, is dedicated to cargo from passenger aircraft and Emirates SkyCentral (DWC), located at Dubai World Central, handles cargo from freighter aircraft. The two facilities which offer a combined cargo handling capacity of over 2 million tonnes per annum, feature extensive dedicated storage for temperature-sensitive goods and a sophisticated Automatic Storage & Retrieval System (ASRS).

With Emirates SkyCargo's dual operation of passenger belly hold cargo being managed at DXB and freighter cargo at DWC, cargo is moved between the facilities 24/7 by a fleet of trucks – including reefers – that are monitored by satellite tracking to ensure the safety and security of cargo and staff. The movement of cargo between the two airports is achieved seamlessly with a transit time of under five hours between the arrival of goods to their departure from freighter to belly hold and vice versa.

Emirates SkyCargo is the first cargo airline in the world that has obtained GDP certification for its Emirates SkyPharma hub operations covering two airports and the 24/7 bonded trucking service that connects cargo between them. The Emirates SkyPharma facilities are the largest GDP certified area in the world offering a total area of 8,600 square metres of combined handling space dedicated for pharmaceutical products at Dubai International and Al Maktoum International Airports.

DESIGNED FOR
FUTURE
EXPANSION

Innovation is a main business driver for Emirates SkyCargo – our product team has developed a number of innovative temperature protection products. The 'White Cover' range of thermal blankets have been developed in collaboration with DuPont. White Cover Xtreme, the latest in the series offers robust temperature protection under hot, cold and wet weather conditions from origin to destination. The team at Emirates SkyCargo have also developed products such as the 'White Container' and the 'Emirates Fresh and Emirates DOC Ventilated Cool Dolly'.

We work closely with our customers to understand their requirements and expectations, and build solutions and innovative offerings around them.

Emirates SkyCargo offers a range of customised transportation solutions for its global cargo customers. Our suite of solutions include Emirates Pharma for transporting temperature sensitive pharmaceutical products; Emirates Fresh for carrying perishables; Emirates Wheels for moving premium and luxury vehicles; Emirates Pets for the air transportation of domestic pets; Emirates AOG for the aviation industry and many more.
