EMIRATES CHARTER

Bespoke solutions. Global reach.

FLY BETTER

OUR FLEXIBLE SOLUTIONS

Emirates Charter offers dynamic solutions that include full charter, part-charter and other flexible options. From oversized cargo to high-value freight, we provide the appropriate solution built around your needs.

Full charter

Our full charter option offers an exclusive freighter from the selected origin to the final destination. It gives full allocation to you and is ideal for oversized cargo or large volume consignments.

Part charter

Part-charter is the perfect solution when an entire aircraft is not required. We reserve the exact space required to fill as you wish with the same level of priority handling and attention-to-detail that a full charter receives.

Freighter re-routing

This solution serves destinations that are not part of our standard flight schedules. Be it adding a stop to a scheduled freighter flight or extending the journey to an alternative destination, freighter re-routing helps to match your exact requirements.

Freighter & passenger combination

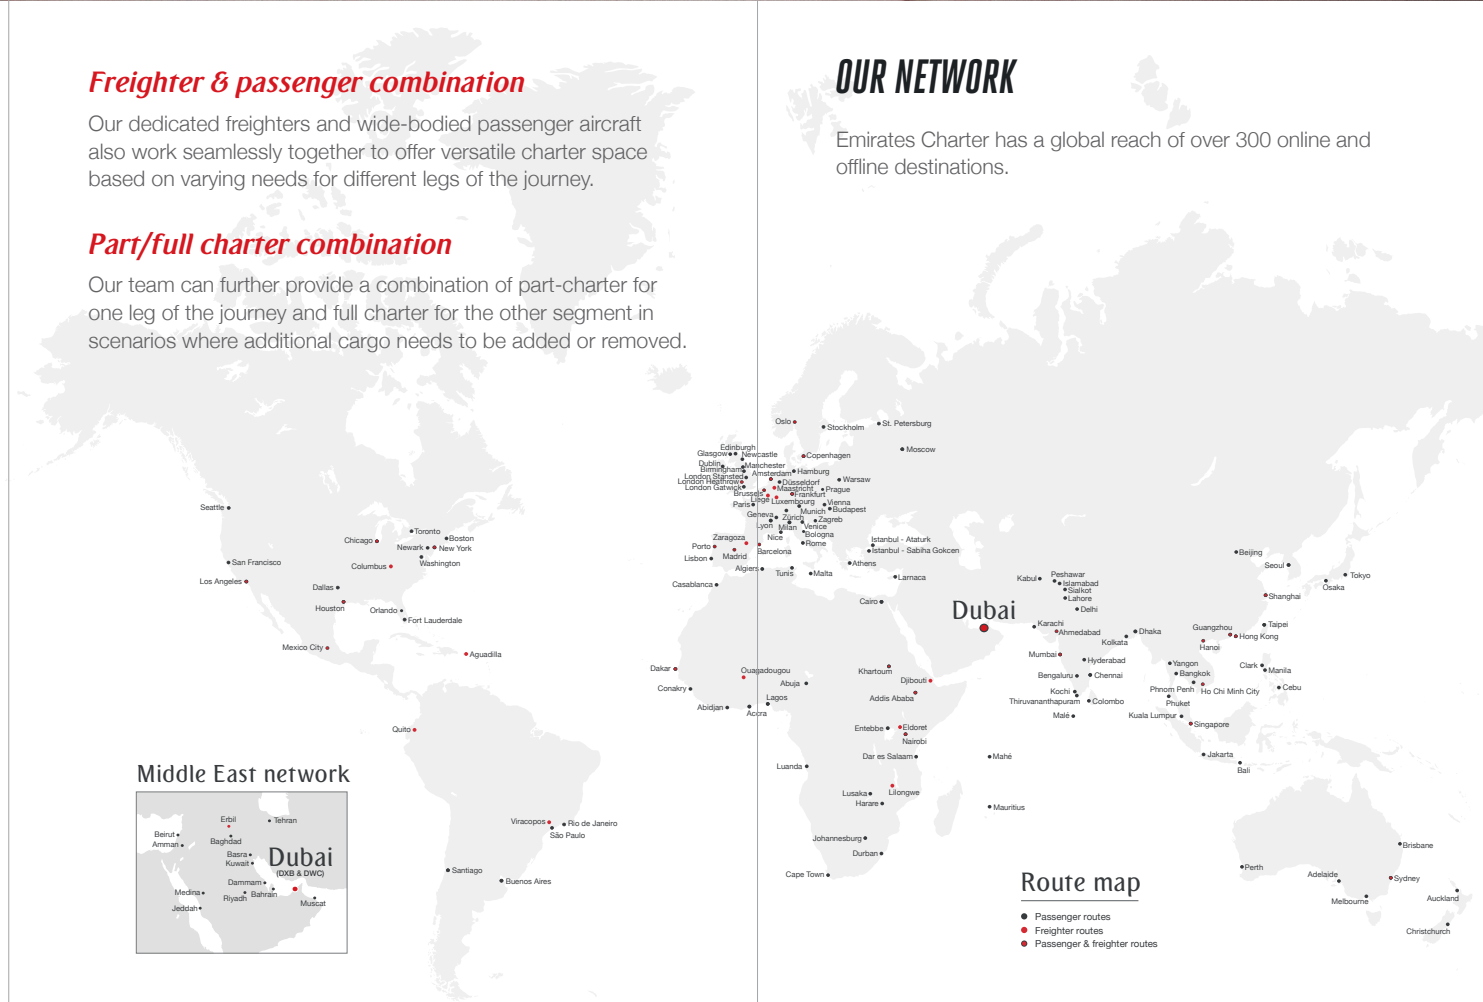

Our dedicated freighters and wide-bodied passenger aircraft also work seamlessly together to offer versatile charter space based on varying needs for different legs of the journey.

Part/full charter combination

Our team can further provide a combination of part-charter for one leg of the journey and full charter for the other segment in scenarios where additional cargo needs to be added or removed.

OUR NETWORK

Emirates Charter has a global reach of over 300 online and offline destinations.
